HOGANSVILLE NURSERIES

JNO. WILKINSON, PROPRIETOR

HOGANSVILLE, GA.

PRICE LIST, FALL 1925—SPRING 1926

GUARANTEE: While we exercise every care to see that our products are handled in a manner that will keep them fresh and alive, we cannot guarantee that they will live or grow after they leave our hands. Any plant which proves to be something other than what it is sold for, will be replaced; but in no case a greater price will be allowed for any plant replaced than originally paid.

TERMS: Our terms are cash, but to those who expect to offer us considerable business, we would be pleased to sell on 30 days credit, provided they can satisfy us that their bills will be paid promptly at that time.

TREES

	SIZE IN FEET				
	4-5	6-8	8-10	10-12	12-14

Callicarpa americana —A desirable native plant, with berries borne in great clusters, which are retained until after frost -----		.75	1.00		
Calycanthus florida —Sweet Shrub -----		.50	.60	.75	
Caryopteris mastercanthus —Blue Spirea—Low shrub with violet blue flowers, blooming in the late summer -----	.50	.75			
Cercis Japonica —Dwarf Judas Tree—Dwarf Red Bud. Red Flowers lining the stems in early spring -----		.75	1.00		

We are right on the Atlanta-Montgomery Highway; just a nice drive on a beautiful road from Atlanta.

SHRUBS

	SIZE IN FEET				
	1½-2	2-3	3-4	4-5	5-6
<i>Chilopsis Linearis</i> —Flowering Willow—Purple flowers in summer			.75	1.00	
<i>Corchorus Japonica</i> fl. pl.—Double Kerria—Yellow flowers on green stems in early spring and summer		.75	1.00		
<i>Corchorus Japonica</i> —Single Kerria—Single yellow flowers in early spring and summer		.75	1.00		
<i>Clethra alnifolia</i> —Sweet Pepper Bush—Dwarf shrub with creamy white flowers. Will thrive in partial shade	.50	.60	.75		
<i>Cydonia Japonica</i> —Japanese Quince—Flowers before foliage in early spring	.50	.60	1.00		
<i>Cystisus scoparius</i> —Scotch Broom—Yellow flowers in great profusion in spring; stems very slender and graceful	.40	.50	.75	1.00	
<i>Deutzia gracilis</i> —Dwarf, double white flowers appear in early spring; desirable for partial shade	.50	.75	1.00		
<i>Deutzia Lemonei</i> —Larger than the above variety, attaining a height of about three feet	.50	.60	1.00		
<i>Deutzia</i> —Pride of Rochester—A tall grower with double white flowers		.50	.60	.75	1.00
<i>Deutzia crenata</i> fl. pl.—Double Flowering Deutzia—A tall grower. Flowers white, the outer row of petals being rose-purple		.50	.60	.75	1.00
<i>Exchorda grandiflora</i> —Pearl Bush—A large shrub with single white flowers in the early spring. Very pretty and desirable		.50	.60	.75	1.00
<i>Euonymus Americana</i> —Strawberry Bush—A native shrub with slender green branches. Fruit scarlet, which appears in late summer makes the plant very attractive		.50	.75	1.00	
<i>Forsythia Fortunei</i> —Fortune's Golden Bell—The upright variety, which is very vigorous and hardy. Yellow flowers in early spring		.50	.60	.75	.85
<i>Forsythia suspensa</i> —Drooping Golden Bell—A variety of Forsythia with drooping branches. Yellow flowers in early spring		.50	.60	.75	.85
<i>Forsythia viridissima</i> —Common Golden Bell—one of the best Forsythias for the South. Yellow flowers in early spring		.50	.60	.75	.85
<i>Hydrangea arborescens</i> —Wild Hydrangea—A native variety with small, but numerous flower heads in midsummer. Very desirable for wild gardens	.50	.75	1.00		
<i>Hydrangea arborescens grandiflora</i> —Everblooming—Commonly called the Everblooming Hydrangea, as it blooms from June to August—White flowers; very hardy	.50	.75	1.00		
<i>Hydrangea otaksa</i> —Large pink flowers in midsummer. This variety is not absolutely hardy without some protection	.75	1.50			
<i>Hydrangea quercifolia</i> —Oak Leaf Hydrangea—A native plant of great merit. Flowers white; foliage crimson in fall and is retained until after frost	.75	1.00	1.25		
<i>Hydrangea paniculata grandiflora</i> —This variety is the hardiest of all hydrangeas, and possibly has the largest flower heads. Flowers white	.50	.60	.75	1.00	
<i>Hypericum Moserianum</i> —2 years, heavy, 50c each. Single yellow flowers in the early spring, and throughout the summer. Dwarf grower and best suited for partially shaded situations	.50	.60	.75		
<i>Hypericum Patulum</i> —St. John's Wort—A tall growing variety, which flowers throughout the entire season. One of the best of all the Hypericums. Single yellow flowers	.50	.60	.75		
<i>Jasmine nudiflorum</i> —Naked Jasmine—Christmas Jasmine. Flowers appear in midwinter on green stems	.50	.60	.75		
<i>Jasmine Revolutum</i> —Yellow Summer Jasmine—A shrub of upright growth with yellow flowers in midsummer	.50	.60			
<i>Jasmine officinalis</i> —White—A dwarf shrub or vine with slender green branches, and star-like white flowers in midsummer	.50	.75	1.00		
<i>Lagerstroemia indica</i> —Crepe Myrtle—Pink, white, crimson and purple—Crepe Myrtle is too well known to need any further description. We are able to supply above colors		.50	.75	1.00	1.50
<i>Lespedeza bicolor</i> —Shrubby Bush Clover—Flowers purple, in late summer		.50	.75	1.00	
<i>Ligustrum ibota regelianum</i> —Regel's Privet—A form of Privet with spreading, often horizontal branches, making it a very attractive plant for massing with other shrubs		.40	.50	.75	
<i>Lonicera Belgica</i> —Monthly Bush Honeysuckle—A dwarf bush honeysuckle, flowers similar to Woodbine. This plant flowers continuously all summer	.50				
<i>Lonicera fragrantissima</i> —Early Honeysuckle—Creamy white flowers in early spring. Foliage remains on plants nearly all winter		.50	.60	.75	1.00
<i>Lonicera Morrowi</i> —Morrow's Honeysuckle—Large shrub with white flowers, changing to yellow. The bright red berries make this plant very attractive		.50	.75	1.00	
<i>Lonicera tartarica</i> —Bright Fruited—Similar to Morrowi, flowers yellow, and fruit reddish-orange		.50	.75	1.00	

SHRUBS

	SIZE IN FEET				
	1½-2	2-3	3-4	4-5	5-6
<i>Philadelphus coronarius</i> —Sweet scented Mock Orange -----		.50	.60	.75	
<i>Philadelphus grandiflora</i> —A tall shrub with single white flowers -----		.50	.60	.75	
<i>Philadelphus avalanche</i> —Dwarf Mock Orange—Very desirable dwarf variety; single white flowers -----		.75	1.00		
<i>Philadelphus Mont Blanc</i> —Possibly one of the best dwarf Mock Oranges -----		.75	1.00		
<i>Philadelphus Lemonei</i> —Hybrid Mock Orange—Dwarf grower -----		.75	1.00		
<i>Prunus Japonica</i> —Flowering Almonds—Flowers appear in early spring ----- (We can supply this in either white or pink flowering varieties.)		.50	.75	1.00	
<i>Punica gratum</i> —Pomegranate—Red Flower—Crimson flowers followed by the fruit in fall makes this one of the most desirable ornamental plants for the lower South -----		.75	1.00	1.50	
<i>Rhodotyphus kerriodes</i> —White Kerria—Single, white flowers, in early spring followed by shining black berries, which are very pretty. -----			.50	.75	1.00
<i>Rhus cotinus</i> —Purple fringe—A large shrub, or small tree, flowering in late summer. The flowers are very showy, resembling purple smoke at a distance. -----		.50	.75	1.00	
<i>Rhus aromatic</i> —Aromatic Sumac—Sweet scented Sumac. Splendid for rock gardens. -----		.50	.75		
<i>Robina hispida rosea</i> —Moss Locust—A small shrub with rose colored flowers. Will thrive in partial shade -----		.50	.75		
<i>Rosa</i> . <i>Roses</i> —Hardy Climbers and Rugosa varieties. The following varieties are for landscape plantings and are not intended for cut flowers: <i>Rosa rugosa</i> , 2 year, 50c; 3 year, 75c.					
Wrinkled Japanese Rose. The attractive foliage and large single flowers followed by bright fruit, which is very persistent make these very attractive for shrubbery planting.					
<i>Rosa rugosa hybrids</i> — The following are hybrids of the <i>Rugosa</i> varieties, which have been selected for their large flowers, continuous blooming and bright fruit. —Blanc Double de Coubert, 2 year, 75c. —Conrad F. Meyer, 2 year, 75c. —Hansa, 2 year, 75c. —Mme. G. Bruant, 2 year, 75c. —Nova Zembla, 2 year, 75c. —Roseraine, 2 year, 75c. — <i>Rosa laevigata</i> , 2 years, 50c; 3 years, 75c. —Cherokee. We are able to supply this in both pink and white varieties. —Carolina, 2 year, 50c; 3 year, 75c. An upright grower, splendid for massing. Flowers pink, fruit red and profuse. —Witchuriana, 2 year, 50c; 3 year, 75c. —Memorial Rose. A hardy half evergreen variety suitable for covering slopes, rockeries, etc. Flowers white, very fragrant.					
<i>Spiraea prunifolia</i> —Bridal Wreath—Double white flowers appearing profusely along the stems, covering the plant completely in early spring -----		.50	.60	.75	
<i>Spiraea Van Houtte</i> —One of the very best white flowering varieties, very hardy and desirable -----		.50	.75		
<i>Spiraea Reevesiana flora plena</i> —A double flowering variety similar to the above -----		.50	.75		
<i>Spiraea Billardi</i> —A hardy upright shrub, which flowers almost continuously throughout the summer. Flowers purplish-red, produced on long spikes. Very useful as a cut flower -----		.50	.75		
<i>Spiraea thunbergi</i> —Early White Dwarf growing early flowering variety. Flowers white followed by attractive feathery green foliage, which remains on the plant usually until Christmas -----		.50	.75		
<i>Spiraea Anthony Waterer</i> —Crimson, very dwarf. A continuous bloomer of flat top clusters of crimson red flowers -----		.50	.60	.75	
<i>Styrax Japonica</i> —A tall shrub with single white flowers, which are borne in large clusters in early spring -----		.50			
<i>Symphoricarpos racemosus</i> —Snowberry—An attractive shrub for shady situations, the white fruit remaining on the plant for a long time -----		.50	.75	1.00	
<i>Symphoricarpos vulgaris</i> —Coralberry—This is one of the best plants for covering rocky slopes, and for partial shade. The red berries remain on the plant throughout the late summer and fall -----		.50	.75	1.00	
<i>Syringa Chas. x</i> —Dark lilac-red lilac. Flowers single -----		.75	1.00		
<i>Syringa Dr. Lindley</i> —Purplish lilac flowers. Flowers single -----		.75	1.00		

SHRUBS

<i>Viburnum opulus sterilis</i> —Common Snowball—Large shrub with white flowers in early spring -----	.50	.60				
<i>Viburnum plicatum</i> —Japanese Snowball—A medium height shrub, large flowers in early spring -----	.50	.60	.75			
<i>Vitex agnus castus</i> —Chaste Tree—A large shrub, or small tree with bluish-purple flowers -----	.50	.75				
<i>Weigelia rosea</i> — <i>Diervilla florida</i> —Rose colored flow- ers in late spring, which completely cover the plant—Very attractive -----	.50	.60	.75			
<i>Weigelia Eva Rathke</i> —A red flowering variety which does not grow quite as tall as <i>Candida</i> --	.75	1.00				
<i>Weigelia candida</i> —The tallest of the weigelias, white flowers -----	.50	.60	.75			

BROAD LEAF EVERGREENS

All evergreens should be dug with a ball of earth attached, and thoroughly burlapped, in order to make transplanting safe. While this is rather expensive, at the same time we believe it worth the additional trouble, and our prices below are for plants handled in this manner.

	1-1½	1½-2	2-2½	2½-3	3-4	4-5
<i>Abelia grandiflora</i> —Free Flowering Abelia -----	.50	.75	1.25	1.50		
(This is one of the most desirable plants on ac- count of the free flowering quality. Small white flowers appear throughout the summer.)						
<i>Aucuba japonica</i> —Gold Dust Tree -----	1.00	2.00	3.00			
(These plants we are able to supply in both the plain green and the variegated leaf forms. They are especially suited to shady situations.)						
<i>Azalea Kamferi</i> —Strong plants—A desirable variety of Japanese Azalea, growing larger than any of the Azaleas of this class. \$2.00.						
<i>Azalea Hinodigiri</i> —Crimson Japanese Azalea—Nice plants. Dwarf variety with crimson flowers, which completely clothe the plant in early spring. One of the very best. \$2.00.						
<i>Azalea ameona</i> —Purple Japanese Azalea—Nice plants. Flowers somewhat later than the above, but a stronger grower. \$2.00.						
<i>Berberis Japonica</i> —Japanese Barberry—A very at- tractive broad leaf evergreen, resembling the Holly. Yellow flowers early spring; adapted to shady situations -----	1.60	2.00	3.00			
<i>Buxus sempervirens</i> —Boxwood—8-10 in., 40c; 10-12 in., 75c—unsheared plants, sheared plants -----	2.00	3.50	5.00	6.50	7.50	
<i>Camellia thea</i> —Tea Plant—Single orange-like flow- ers appearing in midwinter makes this one of the most attractive of the broad leaf evergreens.-----	.75	1.00	2.00	2.50		
<i>Cerasus (prunus) caroliniana</i> —Cherry Laurel—Small plants, 18-24 in., 50c—A small native evergreen tree, or large shrub; glossy green foliage the entire winter; used extensively for screen plant- ings -----	.50	.75	1.00	1.50	2.50	
<i>Crataegus Lalandi</i> —Evergreen Hawthorne—A tall shrub or small tree, covered with white flowers in spring, followed by bright orange fruit, which is very persistent -----	.50	.75	1.50	2.00	2.50	
<i>Euonymus Japonicus</i> —The waxy like foliage of this plant, and the bright red berries make this a most attractive plant for shady situations.-----	.50	.75	1.00	1.50	2.00	

BROAD LEAF EVERGREENS

	SIZE IN FEET					
	1-1½	1½-2	2-2½	2½-3	3-4	4-5
Euonymus Britzensis —Bright Fruited—A form of Euonymus, which fruits very early, and the abundance of fruit makes it very attractive-----	1-1½	1½-2	2-2½	2½-3	3-4	4-5
Euonymus argentea —Silver Leaf Euonymus -----	.50	.75	1.00	1.50		
Euonymus Carrieri —Trailing—Strong plants, 50c, —A trailing form suitable for shrubbery borders. Bright red fruit, which makes it very attractive -----	.50	.75	1.00	1.50		
Eleagnus reflexa —Variegated Eleagnus—Bright green foliage, which is silver underneath, makes this one of the best broad leafed evergreens. Grows rapidly, and suited for shady situations -----	.50	1.00	2.00	2.50	4.00	
Gardenia florida —Cape Jasmine—the old fashioned Jasmine, which is known throughout the South-----	.75	1.50	2.50	3.00		
Ilex glabra —Inkberry or Wineberry. Evergreen in this locality. Black shining berries, which remain all winter -----	.75	1.00	1.50			
Ilex opaca —American Holly—The native Holly. Our stock has been transplanted and can be moved with safety. -----		1.00	2.00	2.50	4.00	
Ilex vomitoria —A small leaf evergreen shrub or tree, covered with numerous red berries. Very desirable -----	1.00	1.25	1.50	2.00		
Illicium anisatum —Anise tree—A shrub with anise-scented foliage -----		1.00	2.00	2.50		
Kalmia latifolia —Mountain laurel—A native laurel which grows along the side of streams in this country -----	1.00	1.50	2.00			
Laurocerasus —English Laurel—A broad leaf evergreen, which is perfectly hardy. Very desirable for shrubbery massing and for background planting -----	1.00	1.50	2.50	3.00	4.00	
Ligustrum amurense —Amoor River Privet—Ordinarily used for hedges, being evergreen in this locality -----				.25	.50	
Ligustrum excelsum superbum —Variegated. Leaf Ligustrum—A tall growing variety of Japanese origin with variegated foliage -----	.75	1.00	1.25	1.50	2.00	
Ligustrum marginatum aureum —Golden Ligustrum A golden leaf variety of Ligustrum, which is very attractive, and grows to considerable height -----	.75	1.00	1.25	1.50	2.50	
Ligustrum Japonicum —Japanese Ligustrum—A very desirable broad leaf evergreen for screen and background planting. A fast grower -----	.50	.75	1.00	1.25	1.50	2.00
Ligustrum Napalense —Foliage smaller than Japonicum; not as tall grower, but more compact. Dark green foliage, does not turn brown in winter. The black fruit is very persistent -----	1.00	1.50	2.50	3.00		
Ligustrum sinensis nanus —Very similar to Amurense, but is more graceful and compact -----		.50	.60	.75	1.00	
Ligustrum Lucidum —Very similar to Napalense, except that the foliage is somewhat larger, and will stand more cold. -----	.75	1.50	2.50	3.00		
Magnolia grandiflora —Southern Magnolia (see trees.) The evergreen Magnolia of the South.						
Mahonia aquifolia —Holly Leaf Mahonia—A plant with prickly foliage similar to Holly, which turns purple in autumn. Yellow flowers in early spring. Does well in the shade -----	1.00	1.25	2.00	4.00		
Osmanthus fragrans —Sweet Olive—Small white, but very fragrant flowers, which appear during the winter. A very desirable plant for the lower South -----	1.50	2.50				
Pittosporum tobira —Tobira or Japanese Pittosporum —A very beautiful and compact growing evergreen. May be sheared into any shape. There is also a variegated foliage variety of this. Not quite hardy as far north as Atlanta -----	1.00	2.00				
Photina serrulata —A small shrub or small tree, the leaves show tones of green, purple and crimson in the spring -----	1.50	2.50	3.50	4.00	5.00	
Quercus sempervirens —Live Oak (see price under head of trees.) A large tree in the lower South, but in more northern sections it only makes a medium sized tree. Foliage evergreen-----		1.00	1.50	2.00	3.00	
Rhododendron Maximum —Great Laurel—Write for prices on other varieties. A native Rhododendron of the Carolina mountains -----	.75	1.00	1.50	2.00	3.00	
Viburnum Tinus —White flowers, which appear in the early spring, but the buds that form during the winter are very conspicuous, and is one of the most attractive parts of this plant -----	1.50	2.00	2.50			

CONIFEROUS EVERGREENS

The prices below include digging with ball, which will be securely burlapped to hold the soil firmly around the roots.

	SIZE IN FEET					
	1-1½	1½-2	2-2½	2½-3	3-4	4-5
Biota orientalis —(Thuya)—Chinese Arborvitae, Pyramidal shape; tall grower; does not turn brown in winter, as some other Arborvitae -----	1-1½	1.00	1.50	1.75	3.50	5.00
Biota aurea nana —Dwarf Golden, very compact, the best of the golden varieties -----	1.50	2.50	3.50	5.00	7.50	10.00
Biota aurea conspicua —Tall Golden—Pyramidal shape. One of the best golden Arborvitae grown -----			2.75	3.00	4.00	6.00
Biota filiformis —Weeping or Thread-Branded Oriental Arborvitae -----	.75	1.25	2.00	3.50		
Biota Rosedale —Bluish-green Foliage—Suitable for boxes, urns and jardinières -----	1.00	2.00	2.50	3.50	5.00	6.50
			12-18	18-24	24-30	
Biota Compacta -----			\$1.50	\$2.00	\$3.50	
Light green, compact foliage, with round shape and dwarf habit of growth, similar to Biota Orientalis Aurea Nana, except that it does not have the golden tip to the foliage.						
Biota Orientalis Elegantissima -----	2-3 ft.,	\$3.00;	3-4 ft.,	\$4.00;	4-5 ft.,	\$5.00
Beautiful golden tipped pyramid.						
Biota Orientalis Pyramidalis -----	18-24 in.,	\$1.00;	2-3 ft.,	\$1.50;	3-4 ft.,	\$2.50;
Of well formed, compact, uniform, pyramidal habit. Broad at base, tapering to point at top, deep green in color.						
Biota Rosedale Hybrid -----	12-18 in.,	\$1.00;	18-24 in.,	\$1.50;	24-30 in.,	\$2.00;
Bluish purple in winter, bright green in summer. Unlike any other Arbor Vitae in foliage. Pyramidal.						
Cedrus deodora —Deodora Cedar—Bluish green foliage—Grows to considerable size -----	1-1½	1½-2	2-2½	2½-3	3-4	4-5
		1.25	2.00	3.50	5.00	7.00
Cupressus Lawsoniana Glauca —Blue Lawson's Cypress. A very symmetrical and beautiful evergreen -----	1.00	1.75	2.50	3.00	4.00	
Cupressus rovali —Columnar shape; compact (also specimen plants) -----	1.00	1.50	1.75	2.00	3.00	4.00
Juniperus communis —English Juniper—A columnar shaped plant with bluish green foliage -----	1.00	1.50	1.75	2.50	3.00	5.00
Juniperus Herbernica —Irish Juniper—Similar to the above, but the foliage is somewhat shorter, and does not stand the sun quite as well as the above -----	.75	1.00	1.50	1.75	2.50	3.50
Juniperus oblonga —Spreading Juniper -----	1.00	1.50	2.50	3.50		
Juniperus communis aurea douglasi —Douglas' Golden Juniper—A prostrate form of Golden Juniper. Very desirable for partial shade -----	2.50	3.50	5.00	6.00	10.00	
Juniperus prostrata —Trailing Juniper—Fine for partial shade and rockeries, strong plants, extra heavy -----	2.00	3.50	4.50	6.00		
Juniperus Sabina tamarisifolia —Strong plants, bright green foliage of prostrate habit. Does well in partial shade -----	1.50	2.50	3.50	5.00		
Juniperus sinensis argentea variegata —Variegated foliage Chinese Juniper, very compact and symmetrical -----	1.00	2.50	3.00	4.00		
Juniperus squamata —Scally-leaf Trailing Juniper—strong plants -----	1.00	2.50	3.50			
Juniper succica —Swedish Juniper. A fast growing columnar shape variety; bluish-green foliage -----	1.00	1.25	1.75	2.50	3.50	5.00
Juniperus virginiana —Red Color -----	1.00	1.50	2.00	2.50	3.50	6.00
Juniperus virginiana glauca —Blue Cedar; grows to be large; does not become unsightly with age -----	1.50	2.25	2.75	3.00	5.00	8.00
Juniperus pfitzeriana —A new variety, which promises to be one of the best—Fine feathery green foliage -----	1.50	1.75	2.50	3.00	6.00	
Picea pungens Kosteriana —Koster's Blue Spruce -----		1.50	2.50	4.00	7.00	
Picea excelsa —Norway Spruce -----		1.00	1.50	2.00	3.50	5.00
Retinospora filifera —Thread-branched Japanese Cypress. A beautiful plant of drooping habit—very graceful -----	1.00	1.50	1.75	2.25	4.00	6.00
Retinospora filifera aurea —A golden variety of the above, but does not grow to be very large -----	2.00	2.50	3.50	4.50		
Retinospora pisifera —A plain green variety, which attains considerable height; fast grower and a very desirable conifer -----	1.00	1.25	2.00	3.00	4.00	5.00
Retinospora pisifera aurea —The same as the above, except of a golden cast -----	1.00	1.25	2.00	3.00	4.00	6.00
Retinospora plumosa —Same as Pisifera, except the foliage is somewhat finer and more plume like -----	1.00	1.25	2.00	3.00	4.00	6.00
Retinospora plumosa aurea —Golden form of the above -----	1.00	1.25	2.00	3.00	4.00	6.00

CONIFEROUS EVERGREENS

	1 ft.	1-1½	1½-2	2-2½	2½-3	3-4	4-5
<i>Retinospora squarrosa veitchi</i> —Foliage silver blue; very fine and feathery. Does well in partial shade -----	1.00	1.25	2.00	3.00	4.00	6.00	7.50
<i>Thuya siberica</i> —Siberian Arbor Vitae—Bluish-green color; compact growth, medium grower -----	1.00	1.25	1.50	1.75	2.00	3.00	
<i>Thuya occidentalis</i> —A very tall and fast growing variety of Arborvitae plain green -----	1.00	1.25	2.00	2.25	2.50	3.00	5.00
<i>Thuya occidentalis globosa</i> —Globe-shaped Arbor Vitae. Dwarf grower -----	.75	1.50	2.00	3.50	4.00		
<i>Thuya occidentalis Hoveyi</i> —A medium growing variety with a round top; very similar to globosa, except taller grower -----	.75	1.00	2.00	2.50	3.50	5.00	
<i>Thuya occidentalis Lobbi</i> —Largest grower of its class, attains considerable height -----		.50	.75	1.00	1.25	2.50	4.00 7.50
<i>Thuya occidentalis pyramidalis</i> —Pyramidal Arbor Vitae—A symmetrical plain green Arborvitae, growing to considerable height -----	1.00	1.00	2.00	2.50	3.50	5.00	7.50
<i>Tsuga Canadensis</i> —Hemlock Spruce -----	1.00	2.00	3.00	4.00	6.00		

VINES

	12 in. hds.	18 in. hds.	24 in. hds.	30 in. hds.
Standard Pyramidals -----	\$1.50	\$2.00	\$3.00	\$3.50
	18 in. tall	24 in. tall	30 in. tall	36 in. tall
Standards Globes -----	\$1.50	\$2.00	\$2.50	\$3.00
We are headquarters for lawn grass. Seed prices quoted on application.				
<i>Ampelopsis Veitchii</i> —Boston Ivy -----			2 year size	\$.50
A deciduous vine suitable for covering stone and brick walls.				
<i>Bignonia grandiflora</i> —Trumpet Vine -----			2 year size	.50
A comparatively new variety with large orange colored flowers.				
<i>Clematis paniculata</i> —Japanese Clematis -----			2 year size	.50
Fine feathery white flowers in summer and fall.				
<i>Clematis Jackmani</i> —Purple clematis -----			2 year size	.50
A rather dwarf growing vine with dark purple single flowers.				
<i>Euonymus radicans</i> —Climbing Euonymous -----			2 year size	.50
An evergreen vine suitable for covering rock walls, brick, etc.				
<i>Euonymus radicans variegata</i> —Variegated Climbing Euonymous -----			2 year size	.50
Same as the above, except that it has variegated foliage. Does not grow as rapidly as the above.				
<i>Gelsemium sempervirens</i> —Carolina Yellow Jasmine -----			2 year size	.50
The native Yellow Jasmine of the South.				
<i>Hedera helix</i> —English Ivy -----			2 year size	.50
Suitable for covering brick, rock, etc.: too well known to need description.				
<i>Lonicera japonica aureo-reticulata</i> —Golden Leaf Honeysuckle -----			2 year size	.50
A beautiful honeysuckle with golden foliage; very attractive for covering slopes and other places which need quick results.				
<i>Lonicera sempervirens</i> —Trumpet or Coral Honeysuckle -----			2 year size	.50
Woodbine.				
<i>Wisteria Chiensis</i> -----			2 year size	.50
Chinese Purple Wisteria. Flowers appear before the foliage in early spring.				
<i>Wisteria chiensis alba</i> —White Wisteria -----			2 year size	.50
A white flowering form of the above.				
<i>Wisteria frutescens</i> —American Wisteria -----			2 year size	.50
A purple flowering variety of rapid growth; flowers appear with the foliage in late spring.				
<i>Wisteria multijuga</i> —Japanese Wisteria -----			2 year size	.50
A large flowering variety with purple blooms before the foliage.				

We have in our employ some of the best landscape men in the States. This establishment represents the work of a lifetime, therefore, we would not offer any but skilled help in arranging and planting your grounds.
